PROFESSIONAL SUMMARY

Entry-level web developer pursuing a B.Sc. in Software Engineering (CGPA 3.56/4.00), with project experience building responsive React.js interfaces from reusable components, managing application state with Redux Toolkit, and integrating REST APIs. Works in JavaScript (ES6+), HTML5, CSS3, and Java, uses Git and GitHub for version control, and applies object-oriented design and debugging practices, with basic backend and database exposure.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, React.js, React Hooks, Redux Toolkit, React Router, Tailwind CSS, Vite, Responsive Web Design, Reusable Components

Programming Languages: JavaScript (ES6+), Java, Python, C

API and Data Handling: REST API Integration, Axios, CRUD Operations, SQL

Tools and Practices: Git, GitHub, VS Code, npm, Object-Oriented Programming, Debugging

Backend and Databases (Familiar): PHP, MySQL, FastAPI, MongoDB

PROJECTS

Ledger: E-Commerce Admin Dashboard

Technologies: *React 19, Vite, Redux Toolkit, React Router, Tailwind CSS, Axios*

- Built a React admin dashboard on the DummyJSON Products API with server-side pagination, debounced search, and category filtering synced to URL query parameters.
- Managed product state with Redux Toolkit (createSlice, createAsyncThunk), including optimistic updates with automatic rollback on API failure.
- Developed dynamic forms with client-side validation, plus bulk selection, batch delete, and batch price/stock adjustment.

Online Code Editor (Group Project)

github.com/Rakib0Diu/OnlineCodeEditor

Technologies: *HTML, CSS, JavaScript, Ace Editor, PHP*

- Team project: a browser-based tool for writing and previewing HTML, CSS, and JavaScript, with code saving and loading.
- Contributed to the authentication system, working on the optional user registration and login functionality.

Pizza Billing System

Technologies: *Java*

- Built a console-based application that takes pizza orders (size, toppings, quantity) and prints an itemized bill in BDT.
- Applied object-oriented design with separate Pizza, OrderHandler, BillCalculator, and BillPrinter classes.
- Implemented size-based pricing, per-topping charges, order subtotal, and 10% tax calculation.

Personal Portfolio Website

Technologies: *React, Vite, JavaScript, CSS*

- Developed a personal portfolio frontend with React and Vite, with ESLint configured for code quality.

T2S: AI-Powered Platform for Student Skill Development

- Concept in progress: a platform to support student skill development, mentorship, collaboration, and career discovery, with planned AI-powered capabilities.

EDUCATION

Bachelor of Science in Software Engineering Ongoing
Daffodil International University, Bangladesh
CGPA: 3.56/4.00

Higher Secondary Certificate (HSC)
Royal Media College, Mymensingh, Bangladesh
